

Soft Closing Kit for up to 40Kg Wooden Door

At last, the closing system we all love in our kitchens, the soft, slow satisfying sound of a drawer gently closing. Now for doors too with Soft Close.

Our Soft Close System is...

- Easy to use - just slide the door towards the closed position and Soft Close takes over, moving the door gently and evenly towards the closed position.
- Quieter, cuts out any inadvertent slamming noise.
- Easy to install and can be installed retrospectively
